“ *I recall an irreverent description of over-nourished African Americans likened to piglets, stampeding the cafeteria of the new Afro-American History Museum Werner entertained, fed, educated, provoked, & humored me for 20 years. He always made me laugh. One could not remain angry with him for long. We fell out during his last year. I miss him every day and can't believe that he is gone. To think we shall never speak again. I told him that his art would last.*
